Our Clientele

Our Clientele

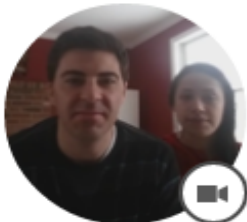

Elsner has been a great group to work with. They do good work and the process was very smooth. They are also very quick to make changes needed and professional in their details of project flow.

- Shane

I would say the that Elsner Technologies has been responsive, and have in more than one occasion exceed the the "paid" hours in order to ensure a successful outcome or resolve an unforeseen issue. The quality of work has been excellent, and the communication thorough. I can gladly say I recommend Elsner to anyone.

- Rob Holmes

Maria and Brian share their experience about working with us. It all started with an idea to build a custom CRM for their business. They appreciate our service delivery methodology and customer relationship management which is our USP. Thank you for recommending us. We value your association with us.

- Maria and Brian

Our Engagement Models

Fixed Cost

- a. For Project Basis Engagement, where requirements are fixed.
- b. Once requirements are shared estimate for the project will be declared.
